Fondital is a premium brand of heating systems. Established over 40 years ago, the company has now developed into a well-established worldwide business enterprise. Fondital's new design lines are the top choice for anyone wishing to add a sophisticated touch to their homes with a wide range of finishes, dimensions and colours. The new design radiators combine beautiful appearance and optimal thermal yield into heating solutions that are true works of art. No compromises. Fondital's new design radiators are appealing, warm and 100% recyclable. Don't miss out on this opportunity, find out more about these innovative products.

"Passion
dyes of its colours
everything it touches"

Baltasar Gracián y Morales

Cool

Cool

The *Atelier collection* was designed to meet an increasing commercial demand for functional, sophisticated and high-quality design radiators, with an environmentally friendly approach aimed at minimising consumption and improving environmental sustainability.

The collection features versatile bathroom furnishing solutions available in a wide range of finishes and dimensions: 20 models, available in 24 colours, centre distances between 400 and 600, heights from 858 to 1740 and 2 types of hydraulic connections. The elegant *Atelier collection* offers innovative and patented technical solutions.

"Atelier collection" is elegant, technological and innovative, 100% Made in Italy

Advantages

- **Made in Italy**
- **12-year** warranty
- **Aleternum** total anticorrosion treatment
- 100%, fully recyclable aluminium
- **20 available models:** heights from 858 to 1740 and centre distances from 400 to 600
- Wide range of colours and finishings
- **Double coating:** durability guaranteed
- **2 types of hydraulic connections:** traditional and central from below
- Patented **assembly system**
- **High mechanical efficiency:** endures a pressure of over 16 bar
- **Easy installation**
- Excellent **quality/price ratio**
- Ideal asset in **low temperature** heating systems

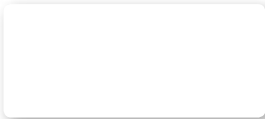

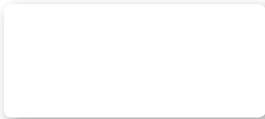

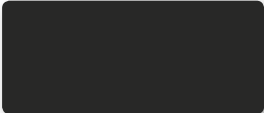

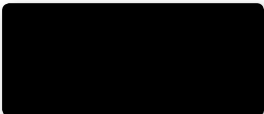

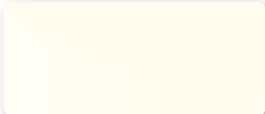

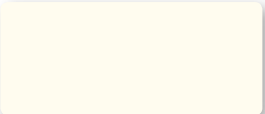

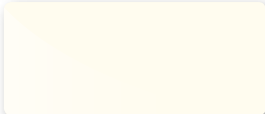

Colours

All colours are available in four finishes:

GLOSS - MATT - TEXTURED MATT - PEARL

The colours shown are merely indicative and not binding, as they may slightly differ, due to the printing process.

	GLOSS	MATT	TEXTURED MATT	PEARL
BIANCO	 Code: 04			 Code: 4M
CORVINO	 Code: 2L		 Code: 3L	
METROPOLITAN			 Code: 3T	
BLACK COFFEE			 Code: 3V	
PEARL	 Code: 2N	 Code: 5N		 Code: 4N
ORGANZA	 Code: 2D	 Code: 5D		
TURTLE		 Code: 5P	 Code: 3P	
COPPER	 Code: 2C		 Code: 3C	

The products in Fondital's design collection are not only characterised by unparalleled durability, but also by extremely creative applications: this is why these charming aluminium radiators can be integrated into many different interior design projects.

A wide range of colours and finishings meets the needs of architects and designers.

	GLOSS	MATT	TEXTURED MATTE	PEARL
TERRA BRUCIATA				
	Code: 2S			
SILVER				
	Code: 2F		Code: 3F

	Code: 2I			

Coloured versions: 45% price increase on the price of a gloss white RAL 9010.

"Discovery consists of
seeing what everybody
has seen and thinking
what nobody has
thought."

ALBERT SZENTGYORGYI

A close-up, artistic photograph of a woman's face. Her eyes are closed, and her lips are slightly parted, showing a vibrant red lipstick. The lighting is soft and warm, highlighting the texture of her skin and the details of her facial features. The image is split vertically by a thin white line.

eCool

eCool

E-Cool is an aluminum electric towel rail radiator available both in analog (EA) and digital (ED) versions. With standard Aleternum anti-corrosion treatment, E-Cool ensures excellent durability and prolonged resistance to corrosive agents.

Available in a different power ratings and wide central distance range, it is able to meet any residential needs while respecting the environment. In fact, the employment of Fondital electric radiators permit to exploit renewable energy sources such as solar photovoltaic panels and wind turbines, contributing to energy saving and air pollution reduction.

eCool EA

eCool ED

Advantages

- **Excellent weight/power ratio:** reduced transport, handling and installation costs.
- Self-adjusting PTC heating element
- Aluminium alloy body with low thermal inertia
- Colour: **RAL 9010**
- **IP44 protection class**
- **Class II insulation**
- Electronic temperature regulation (PI controller)
- NTC temperature probe
- **Fixing system included**

eCool EA

- Boost, 12 and 24 hours programming options
- Interface with **control knobs**
- Operating modes:
Boost/12h/24h/Night/
Freeze protection/Eco/Stand-by

eCool ED

- **LCD** backlight interface
- Window opening detection
- Daily and weekly programming options
- Operating modes:
Programming/Comfort/Night/
Freeze protection/Key lock/
Boost/Eco/Stand-by

Aleternum®

Total anticorrosion treatment

INTRODUCTION

Fondital's Aleternum internal treatment

Corrosion is the main cause of malfunction in heating systems. In addition to degrading system components, it significantly reduces heat output over the years, which consequently leads to a greater economic burden.

For instance, in heating systems with cast-iron or steel radiators, the sludge produced by corrosion will settle at the bottom and obstruct radiators and pipes, reducing or completely hindering heat output and resulting in an unbalanced heat distribution.

To prevent the radiator from corroding, Fondital developed Aleternum®, the exclusive resin-based inner surface treatment to protect the radiator's water chamber.

Aleternum® by Fondital opens up a new era of total protection, safety and high output rates for heating systems. Your heating system will always remain as new as day one!

WHAT IS CORROSION?

✓ Chemical-physical interaction of metal with an aqueous environment resulting in modifications in the metal properties and often leading to loss of functionality of the metal, the environment or the system they operate in.

There are different types of corrosion, depending on the way metallic parts are affected by it:

✓ general corrosion (or widespread corrosion): when the entire surface area of the material is affected by corrosion;

✓ uniform corrosion: when corrosion affects the entire surface area of the material and causes the same amount of damage at all points of the surface;

✓ localised corrosion: corrosion affects only certain areas of the material; the area affected by corrosion may present different morphologies, such as pits, craters, cavities, pinholes, cracks;

plan view			side view
	Uniform Corrosion – general attack		
	Uniform Corrosion – uniform attack		
	Localised Corrosion		
	Pitting	pinhole	
		craters	
		cavities	
	Stress Corrosion Cracking (SCC)	Simple cracks	
		Branching cracks	
	Erosion corrosion		

Plus **Aleternum**[®] treatment

- 1) TOTAL ANTICORROSION TREATMENT
- 2) IDEAL FOR A BROAD PH RANGE
Steel radiators are attacked by corrosion at pH values under 8.
Cool radiators with Aleternum[®] treatment, instead, can even be used in systems with lower pH values, down to **6.5**.
- 3) NO FORMATION OF HYDROGEN POCKETS (NO GAS)
- 4) PREVENTS THE RADIATOR FROM OBSTRUCTING AND FROM THE RESULTING COLD SPOTS
- 5) LIGHTWEIGHT AND EASY TO INSTALL
- 6) CAN BE INSTALLED IN MIXED SYSTEMS
- 7) 12-YEAR WARRANTY
- 8) PATENTED SYSTEM
- 9) NO SEALS: patented connection system
- 10) NO INTERNAL FITTINGS

Technical specifications - Cool

Cool radiator:

The Cool model is supplied with centre distances from 400 to 600 mm.

The Cool model is supplied with heights from 858 to 1740 mm.

Double hydraulic connection available: traditional and central from below (AC acronym).

Connections: G 1/2"

Height (B):

858 - 1152 - 1488 - 1740

Centre distances (A):

400 - 450 - 500 - 550 - 600
